## .NET & Java Developer

Passionate software developer, ready to build creative applications using both IntelliJ and the .NET framework. Proven abilities in software development, analysis, troubleshooting, and completion of projects. Broad experience working in fast paced, team environments.  Comfortable working as a leader or a member of a team, as the situation dictates. Known as a hard worker who likes to be as productive as possible while caring about the results.  Always looking for a better way of doing things and consistently learning new skills.

- Selected as the MVP during the Foundations & .NET Language Accelerated Program and invited to the Mira Awards Gala as a guest of Eleven Fifty Academy.
- Performed in the top 10% of both the HTML and C# exams given during the accelerated program at the Eleven Fifty Academy
- Trained in Agile development methodologies and test-driven design.
- Key contributor in Task Tackler project that won during week-long competition demonstrating proficiency in idea development as well as front and back end code
- Won the teamwork award for team contributions demonstrated throughout the 9 week .NET Accelerated Learning Program

**EXPERIENCE**

**Eleven Fifty Academy**  Carmel, IN
*Software Developer/Apprentice, May 2016 to present*

Eleven Fifty Academy is a nonprofit coding academy that teaches the most relevant and up-to-date coding coursework through immersive learning. Apprentices work in teams on real world projects, for real world customers.
- Currently building Eleven Fifty's student management site, which aims to provide key information for future Eleven Fifty students.
- Most frequent contributor to Eleven Fifty's open source project for ASP.NET students. Have written over a dozen tutorials for the project.
- Work with Technical Design Documents, JIRA, and Git on an hourly basis. Well-versed in Agile methodologies, and have performed as the group Scrum Master.
- Volunteered to join and lead an immersive study group centered around Java and learning Java development.  Focus on strategies for fast-tracking .NET developers into Java development.

**Eleven Fifty Academy**  Carmel, IN
*.NET Accelerated Learning Program, March 2016 to May 2016*

Eleven Fifty Academy's Accelerated Learning Program is a nine-week program that provides students with a foundation in programming fundamentals and trains students using real world coding scenarios.
- Created a professional developer portfolio using HTML, CSS, and jQuery in Sublime Text.
- Architected and built three different MVC applications in ASP.NET, and deployed each one to Azure. One application was voted best in class out of over a dozen other applications.
- Formally trained in current trends in Security, User Experience, Agile, UA Testing, and Legal.
- Spearheaded numerous ongoing Open Source projects on GitHub for Eleven Fifty students.

**Publicis Touchpoint Solutions**  Indianapolis, IN
*Pharmaceutical Service Representative, July 2009 to March 2016*

Publicis is a contract sales company that partners with major pharmaceutical companies to support its products and established sales teams.  Publicis works to define the company's biggest challenges and design a customized, cross-channel solution to communicate the company's message to the right customers, at the right times, and through the right channels. Publicis offers teams built on product training, compliance training, and analytics support to turn the company's goals and objectives into reality.

- Assisted sales team and won a service star award for our collaborative efforts to raise product sales within multiple territories.
- Developed two different territories through routing and planning and won multiple service star awards for techniques demonstrated to other team members within district to help with territory management.
- Consistently obtained performance metrics for bonus payouts and won several service star awards for regularly hitting KPIs and providing tips to teammates to boost district numbers.
- Adept at both product and service training and was selected on many different occasions to present my knowledge and skills to my district and region during training meetings.
- Took on leadership roles within team setting to oversee a specific drug or new process and report the most important information to the rest of the team.

**Walgreens**  Fishers/Indianapolis, IN
*Management Intern/Assistant Manager, May 2006 to July 2009*

Walgreens is a global, pharmacy-led health and well-being enterprise.  It provides customers with everything from medical supplies including prescription drugs, wellness services such as vaccinations and products both seasonal and convenience in nature.

- Helped launch new store in Fishers by completing various activities such as building fixtures, stocking shelves according to required designs, and planning new displays to maximize profits.
- Managed, trained, and coached over 30 employees
- Responsible for security processes and training such as accounting procedures, cash management, reducing shrink/theft, and promoting efficiency practices.
- Obtained pharmacy technician license after completing the training program and passing the certification test.

**EDUCATION**
